

PRIYANKA SIWACH

(929) 582-0786 • priyankasiwach214@gmail.com • github.com/PriyankaSiwach • linkedin.com/in/priyanka-siwach

EDUCATION

Queens College, City University of New York (CUNY)

New York, NY

Bachelor of Science in Computer Science

Expected Graduation: May 2027

- GPA: 3.7/4.00, Dean's List, Honors Student
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Organization & Assembly Programming, Algorithmic Problem Solving, Discrete Mathematics, Calculus III, Cloud Computing, AI/LLM Systems

EXPERIENCE

AIN Ventures

New York, NY

Software Engineer Intern

June 2026 – August 2026

- **Built a founder-sourcing agent** within Brain that re-surfaced strong founders scoring below the 90-point auto-rejection threshold for direct outreach.
- **Benchmarked 200+ prompt-response** pairs and validated guardrail behavior to harden the agent against adversarial inputs.
- Worked with engineers to build and test features for retrieving relevant deals and auto-generating investment memos, from initial spec through debugging issues before release.

Museum of Modern Art (MoMA)

New York, NY

Security & IT Intern

March 2024 – May 2024

- Partnered with IT directors to strengthen MoMA's internal cybersecurity web portal and harden access-control workflows.
- **Used SQL and Excel** to manage employee ID records and support secure access-control operations.

LaGuardia Community College

New York, NY

Student Success Mentor

January 2023 – May 2024

- Facilitated studio hours for 80+ students, troubleshooting technical issues across CUNYfirst, Microsoft 365, Degree Works.

PROJECTS

ChefCoach — iOS App — React, TypeScript, Capacitor, Supabase, OpenAI, RevenueCat

- Shipped an **iOS app** to the App Store with a GPT-4o vision pipeline and local fallback for API outages.
- Wrote a GitHub Actions CI pipeline **with Vitest unit tests** covering scan quotas, allergy filters, and malformed AI JSON to catch bugs pre-release.
- Engineered a **token-bucket rate limiter** and an **LRU cache (HashMap + doubly linked list)** on the recipe-generation endpoint, cutting redundant OpenAI calls and **capping per-user API cost**, alongside JWT auth and input validation.

Applyfy — AI Job Platform (applyfy.net) — Next.js, TypeScript, React, Tailwind CSS, Supabase, Clerk, Stripe, OpenAI API

- Built an end-to-end **AI job-prep platform** that scores resume against job posts and returns keyword gaps and rewrite suggestions in under 2 minutes.
- Implemented a **token-bucket rate limiter** across 15+ API routes to throttle per-user OpenAI calls and **prevent cost overrun**.

Collaborative Whiteboard — Next.js, Node.js, WebSockets, Yjs (CRDTs), Redis Pub/Sub, PostgreSQL

- Eliminated **race conditions** and enabled **real-time multi-user sync** across distributed server instances by implementing **CRDTs** (Yjs) over **WebSockets** with a **Redis pub/sub** backplane and PostgreSQL persistence, supporting **100+ concurrent users** without data loss.

Satellite Telemetry Tracker — Python, DynamoDB

- Built a pipeline that pulls **live satellite telemetry** (latitude, longitude, velocity) from a public satellite API.
- **Designed the DynamoDB schema** for fast lookups of each satellite's latest state, structuring writes to keep only the most recent telemetry per object.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate, June 2026
- AWS Certified Cloud Practitioner, November 2025

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript

Frameworks & Libraries: React.js, Next.js, Tailwind CSS, NumPy, Matplotlib, LangChain, LangGraph

Databases & Cloud: MongoDB, MySQL, PostgreSQL, DynamoDB, AWS (EC2, S3, Lambda, API Gateway, CDK)

Tools: Git, Postman, VS Code, PyCharm, Bootstrap
